Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/989,323

Applicant(s)

FUNDERBURK ET AL.

Examiner

Roberta A Stevens

Art Unit

2665

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 November 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Bottomley (U.S. 6134260).

3. Regarding claim 1, Bottomley teaches (fig. 2) an apparatus comprising a receiver for receiving a CDMA pilot signal, a processor connected to the receiver and an oscillator connected to the processor.

4. Regarding claim 2, Bottomley teaches (fig. 2) a connected frequency signal, a control signal, a timing signal, and a high stability oscillator signal, processes the phase and frequency of the pilot signal with the corrected frequency signal to produce a control signal and the timing signal (col. 3, line 64 – col. 4, line 27).

5. Regarding claim 3, Bottomley teaches (fig. 2) generating the corrected frequency signal by direct manipulation of a high stability oscillator through an electrical timing input.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bottomley.

9. Bottomley does not teach generating a corrected frequency signal through a digital frequency synthesis or analog frequency synthesis. These processes are well known in the art, therefore it would have been obvious to one of ordinary skill in the art to use a particular process as they are well known in the art..

Art Unit: 2665

10. Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bottomley in view of Okamura(U.S. 6014285).

11. As mentioned above Bottomley teaches all of the limitations in claim 1.

12. Bottomley does not teach a processor that has a low pass filter and a lead-lag filter.

13. Okamura teaches (column 7, lines 5 - 14) a control processor that has a low-pass filter.

14. Okamura does not teach a lead-lag filter along with the low pass filter. However, Okamura teaches a notch filter along with an elliptical function filter connected to the low pass filter. Since the purpose of the lead-lag filter or the notch filter along with elliptical function filter (taught by Okamura) is for stabilizing the processor, it would have been obvious to one of ordinary skill in the art to add to Bottomley system a processor with either set up because the result is synonymous.

15. Regarding claim 7, Bottomley teaches (fig. 2) generating the corrected frequency signal by direct manipulation of a high stability oscillator through an electrical timing input.

16. Regarding claims 8 and 9, Bottomley and Okamura do not teach generating a corrected frequency signal through a digital frequency synthesis or analog frequency synthesis. These processes are well known in the art, therefore it would have been obvious to one of ordinary skill in the art to use a particular process as they are well known in the art..

Conclusion

17. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberta A Stevens whose telephone number is 571-272-3161.

The examiner can normally be reached on M-F 9:00am-5:30pm.

18. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu can be reached on 571-272-3155. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

19. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
